83. I’d like to talk with you about issues some people tell us are important. Please look at Card 13. Some people think that the government in Washington should do everything possible to improve the standard of living of all poor Americans; they are at Point 1 on this card. C5. Here is another public issue: genetically modified foods. Genetically modified foods come from plants or animals whose characteristics have been changed by the alteration, addition, or deletion of DNA in their genetic material using advanced laboratory techniques.

Some say that genetically modified foods are unsafe and pose risks for human health. Others say that they are safe and necessary to reduce world hunger. Please look at Card B15. (On a scale of 1 to 5, where 1 means “Very Well” and 5 means “Not at All”), how well do the following groups understand the risks posed by genetically modified foods?

**FI INSTRUCTION: IF ASKED WHAT “ADVANCED LABORATORY TECHNIQUES” MEANS: This typically involves “recombinant DNA” or “gene splicing,” in which genetic material from one organism is inserted into the genes of another. Sometimes, the two organisms are members of different species.**

PART F: NANOTECHNOLOGY

Now for a few final questions about a different topic, a new form of technology called nanotechnology.

F2. Nanotechnology involves manipulating extremely small units of matter, such as individual atoms, in order to produce better materials. (Is that true or false?)

F4. Nanotechnology works at the molecular level atom by atom to build new structures, materials, and machines.
