CONSENT: Categorical (Single)
{intro} (consent_fill) topics may be sensitive for you, and you can decline to answer any question. Most participants find the survey to be interesting with a chance to talk about things that matter to them. Which questions are asked depends upon your answers to other questions. The interview takes from about 60 to 90 minutes for most people.

(If needed: We can break up the interview into different sections if that will make it easier for you.)

Your participation is voluntary. However, all information that you provide will be kept in strict confidence. It is important to us to protect your privacy. All participants' answers are combined, and presented in the form of summary statistics, such as tables and graphs.

Parts of this interview may be recorded for quality control purposes. This will not compromise the strict confidentiality of your responses. May I continue with the recording?

RCONFIRM: Categorical (Single)
Before we begin, I would like to confirm I am interviewing the correct person. Is your name {response to FULLNAME} and were you interviewed for the General Social Survey once before on {response to INTDATE}?

Most men are better suited emotionally for politics than are most women.

A working mother can establish just as warm and secure a relationship with her children as a mother who does not work.

A preschool child is likely to suffer if his or her mother works.

It is much better for everyone involved if the man is the achiever outside the home and the woman takes care of the home and family.

Now we would like you to complete a brief questionnaire on your own.

Remember that all of your answers are completely confidential. They will not be associated with your name in any way, and will be published in summary form only. If there is a question that you don't want to answer, just hold down the [Alt] key and press the [R] key. When you've answered the last question, you'll see a screen that says 'Questionnaire Complete' and you can turn the computer back to me.
