{intro} {consent_fill} topics may be sensitive for you, and you can decline to answer any question. Most participants find the survey to be interesting with a chance to talk about things that matter to
them. Which questions are asked depends upon your answers to other questions. The interview takes from about 60 to 90 minutes for most people.

(IF NEEDED: We can break up the interview into different sections if that will make it easier for you.)

Your participation is voluntary. However, all information that you provide will be kept in strict confidence. It is important to us to protect your privacy. All participants' answers are combined, and presented in the form of summary statistics, such as tables and graphs.

Parts of this interview may be recorded for quality control purposes. This will not compromise the strict confidentiality of your responses. May I continue with the recording?

Some people think that the government in Washington ought to reduce the income differences between the rich and the poor, perhaps by raising the taxes of wealthy families or by giving income assistance to the poor. Others think that the government should not concern itself with reducing this income difference between the rich and the poor.

Here is a card with a scale from 1 to 7. Think of a score of 1 as meaning that the government ought to reduce the income differences between rich and poor, and a score of 7 meaning that the government should not concern itself with reducing income differences. What score between 1 and 7 comes closest to the way you feel?

THIS IS AN ACCEPTABLE RESPONSE. DO NOT PROBE.

I'd like to talk with you about issues some people tell us are important. Please look at the hand card. Some people think that the government in Washington should do everything possible to improve the standard of living of all poor Americans; they are at Point 1 on this card. Other people think it is not the government's responsibility, and that each person should take
care of himself; they are at Point 5.

Where would you place yourself on this scale, or haven't you made up your

Please look at the hand card. Some people think that the government in
Washington is trying to do too many things that should be left to individuals and private businesses. Others disagree and think that the government should do even more to solve our country's problems. Still others have opinions somewhere in between.

The next few items concern some public issues.

The first issue is global warming. Global warming means a trend toward warmer temperatures throughout the world, with more extreme weather in many places and changes in food production that could affect our way of life. Some people believe that the burning of gasoline and other fossil fuels causes global warming. Others say that global warming has purely natural causes.

2007-2008 was designated the International Polar Year. During this year, many scientific and educational organizations made efforts to increase public awareness of the Earth’s polar regions. Building on these efforts, organizations hope that people will learn more about the people and animals that live near the poles, the changes taking place in the environment there, and new scientific discoveries about the Arctic and the Antarctic.
